Sub theme Title : Accelerating Solutions for Climate Change and Environmental Stress

Concept Note:

This seminar aims to accelerate measurable actions for climate change and environmental stress. It aims to formulate an interdisciplinary platform for exploring the scope for climate solutions through scalable interventions, including sustainable agriculture, irrigation technology, the transition to renewable energy, nature-based solutions through bio-diversity restoration etc. The program emphasizes building climate resilience in developing country like India. This event provides a dynamic platform for experts to evaluate global policy frameworks and examine available techniques through cross-sector collaborations in an aim to make them adaptable by local community.
