

Sustainable Technological Innovation:

Subtheme title: Advanced Materials and Plasma Technologies for Sustainable Energy and Health Applications.

CONCEPT NOTE

This track bridges the gap between molecular chemistry and applied physics to accelerate the development of next-generation green technologies and renewable energy devices. By bringing together speakers from both disciplines, we aim to translate fundamental physical laws and innovative chemical designs into scalable, eco-friendly solutions for human welfare..

Plenary Speaker :

1. Professor Samit Kumar Ray, IIT Kharagpur, Ex Director S.N. Bose National Centre for Basic Sciences (Confirmed)

Title: Emerging Materials for Photonic and Energy Harvesting Devices

2. Professor Santanu Bhattacharya, Director, IISER Tirupati

Title of Talk: To be announced

Invited Speakers:

1. Mukesh Ranjan, Scientific Officer - G, FCIPT, Institute for Plasma Research, Gandhinagar, India (Online)

Title: Plasma Surface Engineering for Health and Environment

2. Professor C. V. Yalamaggad, Centre for Nano and Soft Matter Sciences, Bengaluru

Title of Talk: Quantum dot technology in display industry for energy sustainability
